

STEILHOOGTE

PRIMÊRE SKOOL • PRIMARY SCHOOL
SKOOLHOOF/PRINCIPAL: Mnr. E.S. Spamer

At Steilhoogte Primary, we try to prepare all learners for an exciting future. Many of our learners struggle with reading and writing skills, as well as with numeracy. Today's technology gives us unlimited possibilities to address these learning restrictions and enrich every learner as much as possible.

Today, there are so many apps you could use in the classroom that will help learners to overcome learning disabilities and improve their proficiency, but without the necessary equipment, it will not be possible for us to implement them.

iPads can be a game changer when intergraded with educational objectives. Some of the features offered by an iPad can help to address specific contextual challenges or difficulties facing our educational communities. Exposing learners in the classroom to interactive apps has been proven to enhance their motivation, help them engage in activities and improved independent learning. iPads help to enhance overall learning performance in the classroom.

We prefer iPads as it runs a user-friendly operating system that could easily and effectively be adopted by teachers and learners in the classroom. iPads also has an assistive feature, such as 'speak selection', 'guided access' and 'assisted touch' that could help learners with special needs.

Stellar Foundation is assisting Steilhoogte Primary in the endeavor to raise the funds necessary to purchase 30 iPad 5s for their senior learners.
